

Playbook for IT leaders

Secure, scalable SAP mobility without the development burden

As an IT leader, you need stable, secure technology that integrates cleanly, minimises support overhead and aligns with SAP's roadmap. PreBilt delivers all of this, without custom code, high maintenance or hidden complexity. Built by SAP supply chain specialists, PreBilt is SAP-certified, cloud-ready and fully compatible with ECC and S/4HANA. It removes the development pressure traditionally associated with SAP mobility and gives IT teams a platform that's secure, scalable and simple to administer.

Why IT leaders PreBilt it

Zero coding. Zero modification to SAP.

Screens, layouts and labels can be configured without any development, eliminating the long tail cost of custom builds.

Secure by design

Integrate with your identity provider for SSO and MFA and supports full audit logging for compliance and governance.

Simple deployment and administration

Manage users, devices, environments and configurations from the web portal. One secure cockpit, full control.

SAP certified and future proof

With standard integration patterns and continuous investment, stay aligned with SAP ECC, S/4HANA and Public Cloud. Aligns with SAP's Clean Core strategy.

5. Reduced support load

A cleaner UX means fewer user issues, fewer tickets and less time fixing SAP mobility problems.

For IT leaders, PreBilt delivers:

- No-code flexibility for fast changes
- Strong security and identity management
- Clear audit trails and governance
- Lower support costs
- A platform aligned with SAP's roadmap

PreBilt lets IT lead with confidence and scale without complexity.
