

Playbook for finance leaders

Unlock accuracy, efficiency and real-time insight across your SAP supply chain.

As a finance leader, you need accuracy, efficiency and control at every stage of the supply chain. By PreBilting your SAP supply chain you strengthen all three by ensuring every frontline task is completed correctly, captured in SAP instantly and executed with minimal waste. By eliminating paper, manual entry, scanning errors and process delays, you reduce operational cost while increasing productivity and compliance, delivering measurable financial impact from day one.

Why finance leaders PreBilt it

Better data means better decisions

Real-time, accurate SAP data improves forecasting, reduces write-offs and strengthens stock valuation.

Reduced cost-to-serve

Fewer errors, less rework and faster throughput directly lower operational costs.

Faster invoicing and improved cash flow

Processes such as Proof of Delivery and goods receipt feed SAP instantly, enabling quicker billing and fewer disputes.

Lower training and onboarding costs

PreBilt's intuitive UX means staff can be productive within hours, not weeks, ideal for seasonal or temporary labour. Jaguar Land Rover used to take a full month to onboard a new starter on using SAP in their warehouses. Now it takes one day.

Protects revenue and customer satisfaction

More accurate fulfilment and real-time visibility reduce missed shipments, returns and customer credits.

By PreBilting your supply chain you get:

- Lower operational costs
- Stronger financial controls
- Faster revenue recognition
- Reduced compliance risk
- Higher data integrity

Strengthen the financial performance of your supply chain, from productivity to profitability. PreBilt it.
