

Playbook for retail leaders

Keeping stock visible. Keeping fulfilment fast. Keeping customers happy.

Retail never slows down. Customers expect speed, accuracy and availability across every channel whether they're shopping online, in store or clicking to collect. Behind the scenes, teams are juggling fluctuating demand, seasonal peaks, tight margins and constant assortment change. There's no room for error.

When retail operations PreBilt it they get the control and clarity they need to deliver, every day, even at peak.

Built for retail operations that move at pace

Retail supply chains live under pressure. Same day and next day delivery expectations are no longer the exception. Omnichannel fulfilment adds complexity. Promotions can flip priorities overnight. And workforce levels can change week by week.

Choosing to PreBilt helps retail teams stay in control by combining real time SAP data with intuitive, easy to follow execution on the shop floor and in distribution. It simplifies daily tasks, reduces mistakes and keeps stock moving even when everything else is changing.

When retail gets challenging, PreBilt it brings clarity

In retail, complexity builds fast. Multiple fulfilment routes, high SKU turnover, shrinkage risk and tight delivery windows all put pressure on people and processes. Seasonal peaks add another layer, forcing teams to onboard temporary staff quickly often with very little training time.

PreBilt removes friction at the point of execution. Clear workflows guide teams through each task, helping both permanent and temporary staff work accurately and efficiently, with confidence from day one.

PreBilt. Helping teams deliver

Designed around usability and speed. Simple screens and intuitive processes make it easier for every worker, regardless of experience, to do the right thing, first time. New starters typically become productive within two hours, not days or weeks, cutting training overhead when you need capacity the most.

Live visibility across stores and distribution gives teams a single, reliable view of stock levels, locations and priorities. Because PreBilt works directly inside SAP, data stays accurate and up to date, allowing stock to be reallocated quickly to meet demand and keep fulfilment on track.

When demand spikes or priorities shift, PreBilt adapts quickly. Processes can be reconfigured without disruption, helping teams respond fast while maintaining consistency. Even during peak trading, the simple, familiar user experience keeps performance high and error rates low.

To support engagement and retention, PreBilt can introduce gamified workflows and real-time performance feedback. Teams can track progress, stay motivated and spot areas for improvement making work more engaging while reinforcing attention to detail.

The outcome: calm control, even at peak

When you PreBilt retail teams stay in control of stock, fulfilment and daily operations no matter how busy things get. Temporary workers reach productivity fast. Permanent teams stay efficient. Customer promises are met consistently.

The result is a retail operation that's easier to manage, more reliable and ready for whatever the shopping season throws at it.
