

Playbook for supply chain leaders

Keep your supply chain moving faster, cleaner and with complete confidence

As a supply chain leader, you need clarity, speed and reliability across every link of your operation. When you PreBilt you upgrade your SAP processes at the point of work, giving frontline teams the tools to work faster and more accurately and giving you the visibility to make confident, data driven decisions.

SAP admit their standard mobile offering is substandard. But when you PreBilt your SAP supply chain you get clean, intuitive mobile workflows that operators adopt instantly. You remove friction, reduces errors and ensure your supply chain runs with the consistency and control your business expects.

Why supply chain leaders PreBilt it

1. Immediate productivity gains

Operators become productive in minutes. Fewer clicks, clearer screens and intuitive flows mean tasks like receiving, putaway, picking and inventory counting happen faster and with fewer mistakes.

2. Real time accuracy across your operation

Data flows straight into SAP in real time, improving stock accuracy, accelerating replenishment and giving your planning teams complete visibility.

3. Faster deployments, faster ROI

PreBilt can be deployed in hours, not months. Functionality is ready out of the box and layouts can be configured instantly without development.

4. Better operator experience means better outcomes

A modern UI, familiar mobile interactions and minimal training time keep your workforce engaged and empowered, even at peak demand.

5. Confidence in every process, at every site

Whether you're scaling, standardising or operating globally, you ensure consistent, predictable processes from end to end.

By PreBilting your supply chain you get:

- Higher throughput and faster order fulfilment
- Reduced operational costs
- Stronger inventory accuracy
- Lower training overhead

- Better customer experience

Keep your supply chain moving with fewer delays, fewer errors and far more control. PreBilt it.
