

Playbook for warehouse leaders

Give your team the tools to work faster, smarter and with fewer errors.

As a warehouse leader, you need technology that fits the reality of your operation: fast, intuitive, reliable and ready to use immediately. By PreBilting your supply chain you give operators clean, simple workflows that helps them complete tasks quickly and accurately, with less training and fewer manual steps. It's mobility designed for warehouse life: rugged device support, offline capability, real-time SAP updates and a UX that operators can use with confidence from day one.

Why warehouse leaders PreBilt it

Faster task execution

Receive, put away, pick, pack and count stock in fewer clicks with intuitive screens that match the way warehouses work.

Reduce errors and rework

Clear instructions, product images, guided flows and barcode validation improve accuracy across every task.

Rapid onboarding

New operators can be productive within hours thanks to familiar, consumer style interface.

Built for mixed-device environments

Works seamlessly on rugged scanners, tablets and smartphones with automatic screen resizing.

Online or offline operation

Operators can keep working even without network coverage. All actions preserved and syncs back to SAP when the connection returns.

By PreBilting your supply chain you get:

- Faster throughput
- Higher picking accuracy
- Reduced training time
- Lower rework and error costs
- A better operator experience

Make every shift smoother and every warehouse more efficient. Remove paper and instead all interactions directly into SAP in real time. PreBilt it.
